CSE 3044 - SOFTWARE ENGINEERING PROJECT REPORT

COURSE DIARY

GROUP MEMBERS:

150115027 Burak ŞENKUŞ
150115050 Sergen YALÇIN
150114856 Özge YILDIRIM

TOPIC OF THE PROJECT:

The name of our project is Course Diary. The aim of this project is to develop an Android application that we can create weekly course schedule. Then, application creates titles in a course feed corresponding to schedule. These titles will include lecture notes, photos, audio record, attendance status information. By calculating the attendance status, we will be able to view the critical lessons. For example, 'Software Engineering Tuesday 15.00'. We will be able to add notes we want to this title, the photos we took during the lesson and mark our attendance status like 'I went', 'I did not go', 'Cancelled'. Also, it will be possible to save our project/homework deadlines to get notifications.
